

WRITING, PRINTING & DECORATING LINES

Promac By Gorreri F.A.S.T. PRINTER and WROBOT are automated writing and printing systems, able to replicate with precision writings, drawings and decorations that up to now could have been made only manually with great use of time and only by specialized personnel.

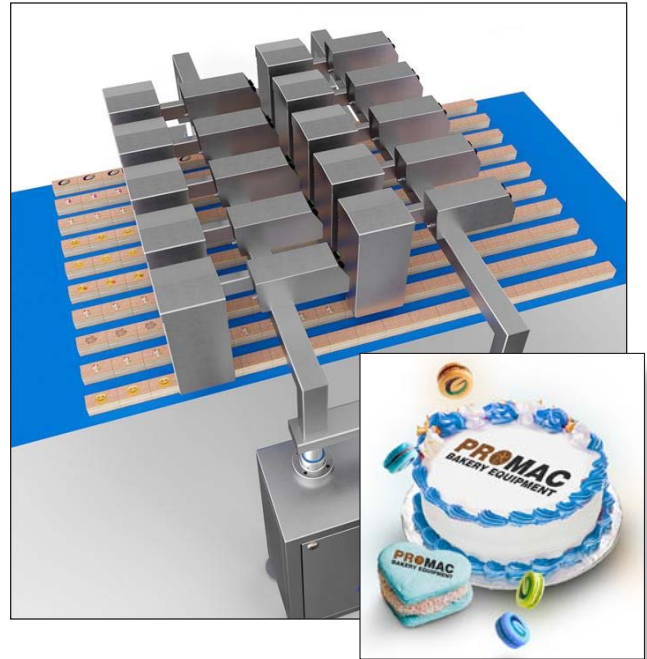

F.A.S.T. PRINTER

This printer is an innovative system engineered to print with edible and certified inks on cakes, macaroons, bread, cake rusks or melba toasts and all other products you want to create as unique.

F.A.S.T. PRINTER is engineered to print writings, images and drawings over the food product directly from your PC, even remotely. It is able to print over 100 different images in sequence or over the same production row. F.A.S.T. PRINTER prints with a color or b/w multi-head by means of double head that guarantees image sharpness and avoids break downs.

BENEFIT

- Natural inks, certified all over the world and customizable
- Speed and sharpness
- Totally certified for the food industry
- Self-cleaning printing heads system

WROBOT

WROBOT is the innovative and technological Robot for printing, drawing and decorating cakes, biscuits, buns and every other type of product that needs to be unique.

Through a rotating arm, it is able to transfer drawings & writings directly from a PC to the end product. It is also able to make perfect decorations with whipped cream, icing, chocolate and butter creams. Write, import or draw, even by free hand on touch screen a draw, a decoration or a writing.

WROBOT will replicate them on your product precisely and fast.

BENEFIT

- Perfect for masked cakes with whipped cream and already decorated
- Possibility to write with an electronic impulses gun
- Possibility of heated nozzles to write with chocolate
- Availability of "stand alone" (free standing) or "in line" machine
- Fast and precise
- Totally certified for the food industry
- Easy to use, quick to clean
- Easy interchangeability of decorating and writing nozzles
